FILIPPO CORRADI

Computer Engineering MSc Student

filippo.corradi2003@gmail.com | +39 3450554727 | filippo.corradi@studenti.unipd.it
Casier (TV) | filippo-corradi | Piopoc

PROFILE

Computer Engineering MSc student specializing in Web Information and Data Engineering, with hands-on experience in backend development, cloud services and data-intensive applications. Interested in distributed systems and cloud infrastructure, building software that integrates data platforms and AI-based tools.

EXPERIENCE

Software Engineering Intern

M31

September 2024 – October 2024 | Padua, PD

Piopoc/IoT-simulator.git

- Developed a Go backend for querying and serving historical IoT data stored in Google BigQuery.
- Implemented REST APIs for retrieving device data based on device ID and time range.
- Built a lightweight web interface for visualizing time-series IoT data.

PROJECTS

SoccerFELLA

- Full-stack web application for tracking, discussing and rating daily football matches
- Group project developed as part of a university course

Tech: Go, Google BigQuery, REST, HTML/JavaScript, Google Cloud

CheckThat! 2026 at CLEF 2026

- Development of an Information Retrieval system for Task 1 of CLEF 2026 with the goal of retrieving scientific paper implicitly cited in a social media post
- Group project developed as part of a university exam

ceur-ws.org/Vol-4283/paper61.pdf

Tech: Python, Java, Hugging Face

Topic-Driven Document Intelligence Platform

github.com/Piopoc/TDDIP.git

- Designed and implemented a containerized document processing and retrieval platform for ingesting heterogeneous textual datasets.
- Built a processing pipeline integrating MongoDB for document storage, Elasticsearch for full-text indexing and MALLET/LDA for topic modelling.
- Developed Spring Boot REST APIs and a React frontend for document analysis and search.

Tech: Java, Spring Boot, MongoDB, Elasticsearch, Docker Compose, React, LDA

Monopoly

Piopoc/Monopoly.git

- Developed a terminal-based Monopoly game in C++ with human and CPU players.
- Applied object-oriented design, dynamic memory management and CMake-based build configuration.

Tech: C++, CMake

EDUCATION

MSc in Computer Engineering

University of Padua

Sept 2025 – Ongoing

BSc in Computer Engineering

University of Padua

Sept 2022 – Sept 2025

SKILLS

Programming

Java | Python | C++ | SQL | HTML/CSS

Backend & Web

Spring Boot | REST APIs | Tomcat | Servlet/JSP

Databases & Search

PostgreSQL | MongoDB | Elasticsearch | BigQuery

Cloud & Tools

Docker | Docker Compose | Git | Maven | CMake | LaTeX

SOFT SKILLS

Teamwork | Problem solving | Adaptability | Self-learning

LANGUAGES

- Italian: native speaker
- English: B2

INTERESTS

Linux
HomeLab
